HISTORY

Like a number of settlements in the great timber country of the North, Merrill was some time arriving at the name of Merrill. In the early 1840's as the Timber Country was open to meet the needs of the tree barren prairie states and a growing nation, the present site of Merrill was known as Jenny Bull Falls. It lay at the heart of a vast forest land known best to the Chippewa Indians who camped at Big Eddy and pow-wowed at Council Grounds.

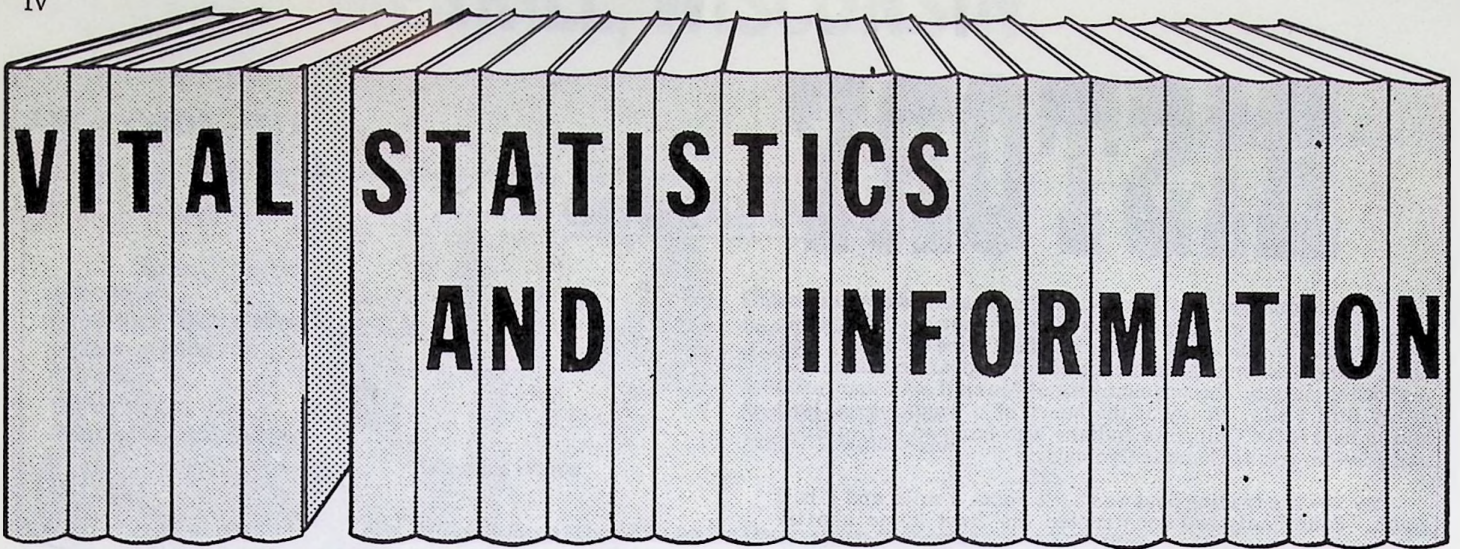

By 1843, a trading post was built about a mile and a half south. John Faely had constructed the first home shortly before. Four years later, Andrew Warren began construction of a dam across the Wisconsin River at the foot of Mill Street. Warren also built the first of what was to be a number of saw mills in Jenny Bull Falls and later Merrill. The mill was powered by the dam which was nine feet high and nearly 500 feet wide. In 1870, T. B. Scott succeeded Warren in ownership of the mill. By 1880, the mill had an annual capacity of 10 million board feet plus two million shingles. Fifteen years later the mill was producing 25 million feet of lumber and 20 million shingles. In 1899, this highly productive mill burned to the ground. In the meantime, Jenny Bull Falls legally changed to Merrill in honor of the general manager of the Chicago, Milwaukee, St. Paul and Pacific Railroad, Mr. S. S. Merrill. This railroad and passenger depot, a hub of social activity thru the boom lumbering years and after, has become a community youth center.

A number of significant events took place during the 1880's and 1890's. Coinciding with the adoption of the name Merrill in 1881, the Wisconsin Telephone Company began operation with 20 phones in service. By 1885, the population had reached 7,000 persons, only three thousand less than live in Merrill today. Two years before, in 1883, the first City Council met and T. B. Scott was named the lumber city's first mayor.

Electric street cars were placed in operation in 1890, one of the first such installations in the world. Further evidence of the refinement of civilization were seen a year later when the T. B. Scott Library was opened. Eighteen Ninety-One was the arrival in Merrill of the famed Hans V. Kaltenborn. Only a lad of 13, Kaltenborn grew to maturity here with his family and then went on to become the dean of American news commentators. Eighteen Ninety-Two marked the peak of the lumbering boom. That year, with eight mills in operation, a staggering 150,000,000 board feet of lumber were produced along with 86 million shingles. From this point, the impact of lumbering began to taper off primarily due to the decline in the great pine forests. The lumbering men began to concentrate on the hardwood forests ... in 1898 nearly 20 mills in this area produced hardwood lumber. Merrill's present recognition as a principal millwork center seems only natural in light of the lumbering background of the community.

The turn of the century marked a milestone for Merrill. Faced with a diminishing timber supply, the people who had built the city faced a decision -- move on to greater timber resources, or stay and diversify their industry. Their decision to stay underscores one of the great strengths of Merrill today ... a diversity of industry that provides a stable economic base and avoids those problems inherent in a city of one or few industries.

WEDDING ANNIVERSARIES

By tradition, certain wedding anniversaries have special names according to the number of years of marriage being celebrated and it is customary, when

selecting an anniversary gift, to choose an article appropriate to the particular anniversary. Listed below are the anniversary names generally recognized.

1st Year—Paper or Plastic
 2nd Year—Cotton or Calico
 3rd Year—Leather
 4th Year—Linen or Silk
 5th Year—Wood
 6th Year—Iron
 7th Year—Copper or Wool
 8th Year—Bronze or Electric Appliances
 9th Year—Pottery or China
 10th Year—Tin or Aluminum
 11th Year—Steel
 12th Year—Linen or Silk

13th Year—Lace
 14th Year—Ivory
 15th Year—Crystal or Glass
 20th Year—China
 25th Year—Silver
 30th Year—Pearl
 35th Year—Coral or Jade
 40th Year—Ruby
 45th Year—Sapphire
 50th Year—Gold
 55th Year—Emerald
 60th Year—Diamond

Safety In The Home

As important as it is for you and your family to have proper medical attention and a diet high in nutritional value, it is just as important to know what to do in case of an emergency. Hundreds of people are killed each year in deaths related to accidental poisoning or overdoses. Many of these lives could be saved if more people were aware of the emergency measures to take in such cases.

Hundreds more die as a result of injuries sustained in accidents. Many of these deaths could also be avoided with simple knowledge of first-aid procedures.

This section of the City Directory tells you what to do in an emergency. Make sure you keep it in a handy place. Read the First Aid instructions frequently and carefully. In fact, have every member of your family read them. **REMEMBER, ACCIDENTS CAN AND DO HAPPEN. MAKE SURE YOU KNOW WHAT TO DO.**

POISONS, OVERDOSES AND ANTIDOTES

Every year more than 60,000 children eat or drink something poisonous, or take accidental overdoses. Hundreds of deaths and thousands of children with permanent damage of one kind or another is the result. Speed is the most important factor in saving lives and preventing permanent damage in cases of poisoning or overdosing.

1. Call a physician immediately.
2. If a physician isn't available, call a hospital, the police department or poison control center if there is one in your community.

3. Keep the victim warm.
4. If the victim is unconscious, do not give liquids.
5. If the victim is unconscious or having convulsions, do not induce vomiting.
6. Save the bottle or container from which the poison came.
7. Keep the following list of poisons and antidotes in a handy place, and apply the suggested antidotes.

Acids	Give a large quantity of water, 2 tablespoons of milk of magnesia or similar antacid; do not induce vomiting.
After-Shave Lotion	Give a glass of milk, induce vomiting (as with Camphor) and give 2 teaspoons of bicarbonate of soda in a glass of water.
Camphor	Induce vomiting with finger in throat, or 1 tablespoon of syrup of ipecac, followed by a glass of water, or a teaspoonful of mustard in half a glass of water.
Carbon Monoxide	Carry victim into fresh air, lie victim down and give artificial respiration, if necessary.
Chlorine Bleach	Give one or two glasses of milk.
Cologne, Perfume	Use same remedy as for After-Shave Lotion.
Detergents	Use same remedy as for Chlorine Bleach.
Disinfectant With Chlorine	Use same remedy as for Chlorine Bleach.
Disinfectant With Carbolic Acid	Induce vomiting (as with Camphor). Then give 4 tablespoons of castor oil and a glass of milk or the white of 2 raw eggs.
Food Poisoning	Induce vomiting (as with Camphor). Then give 2 tablespoons of epsom salt in 2 glasses of water, except in cases with severe diarrhea.

POISONS, OVERDOSES AND ANTIDOTES

Furniture Polish	Give water or milk, then 4 tablespoons of vegetable oil. Do not induce vomiting.
Gasoline, Kerosene	Use same remedy as for Furniture Polish.
Household Ammonia	Give 2 tablespoons of vinegar in 2 glasses of water. Give the white of 2 raw eggs or 2 ounces of vegetable oil. Do not induce vomiting.
Insect and Rat Poisons With Arsenic	Give glass of milk or 1 tablespoonful of activated charcoal mixed with a little water. Induce vomiting (as with Camphor) but not with syrup of ipecac if charcoal was given.
With Sodium Flouride	Give glass of milk or lime water. Induce vomiting (as with Camphor).
With Phosphorous	Induce vomiting (as with Camphor) but don't let vomit come in contact with victim's skin or yours. Then give 4 ounces of mineral oil. Do not give animal or vegetable oil. Give 1 tablespoon of bicarbonate of soda in a quart of warm water.
With Strychnine	Give glass of milk or activated charcoal in water. If there are no convulsions, induce vomiting (as with Camphor), except do not use ipecac if charcoal was given. Keep victim quiet.
Lighter Fluid	Use same remedy as for Furniture Polish.
Lye	Use same remedy as for Household Ammonia.
Wild Mushrooms	Use same remedy as for Food Poisoning.
Oil of Wintergreen	Use same remedy as for After-Shave Lotion.
Pine Oil	Use same remedy as for Furniture Polish.
Rubbing Alcohol	Use same remedy as for After-Shave Lotion.
Turpentine	Use same remedy as for Furniture Polish.

Overdose

Antidote

Alcohol	Use same remedy as for After-Shave Lotion.
Aspirin	Use same remedy as for After-Shave Lotion.
Barbiturates	Give activated charcoal in water and induce vomiting (as with Camphor, but not with ipecac). Give 2 tablespoons of epsom salt in 2 glasses of water.

Continued

Overdose	Antidote
Belladonna	Use same remedy as for Insect and Rat Poisons with Strychnine.
Bromides	Use same remedy as for Food Poisoning.
Codeine	Induce vomiting if victim is conscious (as with Camphor) and give a glass of milk or activated charcoal in water. Give 2 tablespoons of epsom salt in 2 glasses of water. Keep victim awake.
Headache & Cold Medications	Use same remedy as for After-Shave Lotion.
Iron Compounds	Induce vomiting (as with Camphor) and give 2 teaspoons of bicarbonate of soda in a glass of water. Give a glass of milk.
Morphine, Opium	Use same remedy as for Codeine.
Paregoric	Use same remedy as for Codeine.
"Pep" Medicines	Use same remedy as for Insect and Rat Poisons with Arsenic.
Tranquilizers	Use same remedy as for Barbiturates.

HOMEOWNERS FIRST AID

MOUTH TO MOUTH BREATHING

Call
a doctor
first!

1. **START IMMEDIATELY!** Call a doctor! Two exceptions: If gas or smoke are present, remove victim to fresh air; if electric shock is cause, make sure body is not in contact before touching.
2. **REMOVE FOREIGN MATTER** from mouth.
3. **TILT HEAD BACK** with victim on back, neck extended, grasp lower jaw, lift forcefully upward into jutting-out position as shown.
4. **IF AIR PASSAGE IS NOT CLEARED**, strike sharp blows between shoulder blades.
5. **OPEN YOUR MOUTH WIDE**, cover victims mouth completely, airtight, close victim's nose by pinching. With children-cover both mouth & nose with your mouth.
6. **BLOW AIR INTO VICTIM'S LUNGS** until chest rises (less forcefully for children). Remove mouth, allow exhale. If chest does not rise, check for correct position and removal of foreign matter. Tongue may be blocking air passage.
7. **REPEAT** (20 times a minute for adults, 12 a minute for children) until victim revives. Don't stop!

Call
a doctor
first!

HEART MASSAGE

In a heart emergency, when the victim shows evidence of heart stoppage, artificial respiration must be started at the earliest possible moment. An effective method for first aid treatment is the closed-chest heart massage. Only equipment needed is the hands. Turn victim on his back, resting against some solid support, head tilted far back, jaw jutting out. Kneel at left side of body and place heel of one hand on lower portion of breast bone, other hand on top as shown at left. At rate of approximately 60 compressions per minute (pulse rate) press down with both hands until breast bone is depressed from one to two inches. Lift hands between each stroke so that breast bone returns to normal position.

POISONED WOUNDS

POISONED WOUNDS - From bite of animal - Treat immediately. Wash under running water to remove animal saliva. Have patient lie down. Apply bandage above wound to prevent spread of poison. With sterilized tip of knife or razor cut into the wound, a depth of 1/8 to 1/4 inch over each fang mark, and let poison out. Apply suction, or if necessary suck wound out by mouth, provided there are no open sores or wounds in mouth, remove as much poison as possible. Be careful not to swallow. Continue suction about a half hour. Cauterize with nitrate acid, chloride of zinc or nitrate of silver, or by applying white hot iron. Give patient stimulants and rush to doctor.

BLEEDING CAN ALMOST ALWAYS BE CONTROLLED BY PRESSING PAD OF CLOTH OR GAUZE OVER THE WOUND.

PRESSURE POINTS

Severe bleeding must be stopped at once. If you cannot do the following use finger pressure until help is available.

1. **Get a thick pad of cloth**, sanitary napkin, gauze or clothing.
2. **Press pad directly over wound**. When bleeding is controlled, add more layers and bandage.

FOR ARTERIAL (SPURTING) FROM ARM OR LEG DO THIS

1. **Raise wound** above rest of victim's body and follow steps 1 and 2.
2. **Press artery against bone** (see chart for pressure points) between wound and heart.
3. **Do not use tourniquet** unless you are a trained first aider!

FIRST AID KIT

ASSEMBLE THESE

FIRST AID SUPPLIES NOW

BEFORE YOU NEED THEM:

Sterile gauze compresses and pads. Sealed rolled gauze bandages. Adhesive strip bandages — tape. Sterile absorbent cotton./ Iodine (2% solution or consult pharmacist). Petroleum jelly. Bottle of calamine lotion. Aromatic spirits of ammonia. Milk of magnesia. Dry mustard. Baking soda. Universal antidote for poisons (buy from druggist). Scissors, tweezers. Medicine dropper. Fever thermometer. Hot water bottle. Ice bag.

In all cases of serious shock or injury, send for a doctor or ambulance at once. In the meantime, apply first aid promptly, but not hastily.

BLEEDING WOUNDS - Bleeding in spurts indicates severing of an artery. Steady flow indicates a vein has been cut. Bleeding from an artery should be stopped by applying pressure of the thumb, a compress or cloth pad over the artery at a point between the bleeding wound and the heart. In bleeding from a vein (steady flow), pressure should be applied on the side away from the heart. Where bleeding is not severe, a compress over the open wound should be sufficient. If bleeding is very severe, tourniquet may be made by tying handkerchief, cloth, belt, strap, or necktie around the part over compress and using small stick, pencil, or similar article with which to twist and tighten. Do not twist too hard, just enough to stop bleeding. Loosen every twenty minutes to let a little blood escape. Keep the part elevated.

SHOCK

SHOCK - Lay patient flat on back with head low, unless head is bleeding. Remove false teeth, gum or tobacco from mouth. Keep patient warm. Give stimulants such as aromatic

spirits of ammonia in water, hot coffee, tea or water. Do not give stimulant to an unconscious patient, or to one who may have internal bleeding.

IMPORTANT DON'TS

- Don't** attempt to give anything by mouth to an unconscious person
- Don't** use anything from a container that is unlabeled or on which the label is obscured.
- Don't** give a cathartic or laxative in any case of severe or persistent abdominal pain.

- Don't** take medicine from a container in the dark.
- Don't** keep poisonous drugs in the medicine cabinet or near other medicines. **Do** keep lids closed with adhesive tape or with pins in corks as warning signals!
- Don't** keep poisons within reach of children.

To find diameter of a circle multiply circumference by .31831.

To find circumference of a circle multiply diameter by 3.1416.

To find area of a circle multiply square of diameter by .7854.

To find surface of a ball multiply square of diameter by 3.1416.

To find side of an equal square multiply diameter by .8862.

To find cubic inches in a ball multiply cube of diameter by .5236.

Doubling the diameter of a pipe increases its capacity four times.

Double riveting is from 16 to 20% stronger than single.

One cubic foot of anthracite coal weighs about 58 lbs.

One cubic foot of bituminous coal weighs from 47 to 50 lbs.

One ton of coal is equivalent to two cords of wood for steam purposes.

There are nine square feet of heating surface to each square foot of grate surface.

Each nominal horse power boiler requires 30 to 35 pounds of water per hour.

To sharpen dull files lay them in diluted sulphuric acid until they are eaten deep enough.

A horse power is equivalent to raising 33,000 pounds one foot per minute or 550 pounds one foot per second.

The average consumption of coal for steam boilers is 12 pounds per hour for each sq. foot of grate surface.

To find the pressure in pounds per square inch of a column of water multiply the height of the column in feet by .434.

Steam rising from water at its boiling point (212 degrees) has a pressure equal to the atmosphere (14.7 pounds to the square inch).

THE NATIONAL PARK SYSTEM OF THE UNITED STATES

Source: National Park Service

The National Park System of the United States is administered by the National Park Service, a bureau of the Department of the Interior. Started with the establishment of Yellowstone National Park in 1872, the system includes not only the most extraordinary and

spectacular scenic exhibits in the United States but also a large number of sites distinguished either for their historic or prehistoric importance or scientific interest, or for their superior recreational assets. The number and extent of the various park areas as of 1973 are as follows:

Name and location	Year established	Acreage	Outstanding characteristics
Acadia (Maine)	1919	41,651	Rugged seashore on Mt. Desert Island and adjacent mainland
Arches (Utah)	1971	73,388	Unusual stone arches, windows, pedestals, caused by erosion
Big Bend (Texas)	1935	708,118	Mountains and desert bordering the Rio Grande
Bryce Canyon (Utah)	1924	36,033	Area of grotesque eroded rocks brilliantly colored
Canyonlands (Utah)	1964	344,481	Colorful wilderness with impressive canyons, spires, arches
Capitol Reef (Utah)	1971	241,865	Colored sedimentary rock formations in high, narrow gorges
Carlsbad Caverns (N. Mex.)	1930	46,755	The world's largest known caves; spectacular flight of bats
Crater Lake (Oregon)	1902	160,290	Deep blue lake in heart of inactive volcano
Everglades (Florida)	1934	1,400,533	Subtropical area with abundant bird and animal life
Glacier (Montana)	1910	1,013,276	Rocky Mountain scenery with many glaciers and lakes
Grand Canyon (Arizona)	1919	673,561	Mile-deep gorge, 4 to 18 miles wide, 217 miles long (105 in park)
Grand Teton (Wyoming)	1929	310,462	Picturesque range of high mountain peaks
Great Smoky Mts. (N.C.-Tenn.)	1926	516,859	Highest mountain range east of Black Hills; luxuriant plant life
Guadalupe Mountains (Texas)	1966		Contains highest point in Texas: Guadalupe Peak (8,751 ft.)
